

# NEW BRACKET

Our **340/350** and **340D/350D** now feature **easier to install, mechanically attached hanger brackets**. These improvements, along with a revised header, hide the bracket creating a cleaner look.

Each Alumax Service center will have stock of the new units by April 14<sup>th</sup>. All custom doors will start using the new design immediately. Details and glass templates for the new bracket can be found on the Dealer Services section of our website:
